1 GENERAL INFORMATION

1.1 Contact Data

Support

If you cannot find information you need in this guide, or if you have questions or problems, contact Brainlab support:
support@qentry.com

Expected Service Life

Brainlab provides five years of service for software applications. During this period of time software updates are offered.

Feedback

Despite careful review, this user guide may contain errors.
Please contact us at info@qentry.com if you have improvement suggestions.

-

Patent Information

This product may be covered by one or more patents or pending patent applications. For details, see: www.brainlab.com/patent.

Integrated Third-Party Software

This software is based in part on the following work:

- The Independent JPEG Group (<https://github.com/uclouvain/openjpeg/blob/master/LICENSE>).
 - The AWS SDK for .NET developed by Amazon.com, Inc. (<https://aws.amazon.com/legal/>)
 - The ClearCanvas SDK developed by ClearCanvas, Inc. (<https://clearcanvas.github.io/>)
 - The Log4Net developed by the Apache Software Foundation. (<https://logging.apache.org/log4net/>)
 - The Microsoft .NET Framework SDK developed by Microsoft Corp. (<https://docs.microsoft.com/en-us/legal/termsofuse>)
 - The Microsoft .NET Framework (WCF) developed by Microsoft Corp. (<https://docs.microsoft.com/en-us/legal/termsofuse>)
 - The Microsoft DeepZoomTools developed by Microsoft Corp. (<https://docs.microsoft.com/en-us/legal/termsofuse>)
 - The Microsoft DirectX SDK (February 2010) developed by Microsoft Corp. (<https://docs.microsoft.com/en-us/legal/termsofuse>)
 - The Open DICOM developed by Albert Gnanndt (<https://sourceforge.net/projects/pendicom/>).
 - The SharpZipLib (.NET) (<https://github.com/icsharpcode/SharpZipLib>).
-

CE Label

The CE label indicates that the Brainlab product complies with the essential requirements of Council Directive 93/42/EEC (the “MDD”).

Qentry.com is a part of **Qentry**, which is a Class I product according to the rules established by the MDD.

Report Incidents Related to This Product

You are required to report any serious incident that may have occurred related to this product to Brainlab, and if within Europe, to your corresponding national competent authority for medical devices.

Sales in US

US federal law restricts this device to sale by or on the order of a physician.

No Medical Advice

Neither Brainlab nor **Qentry** provide any medical advice. The customer is solely responsible for all medical decisions, including but not limited to the interpretation of any patient data, and any diagnosis, treatment or treatment plan made by the customer in connection with the use of **Qentry**. The customer acknowledges that image capture, image processing and image display also depend on the customer's specific computer hardware environment and corresponding system settings which are beyond reasonable control of Brainlab. Brainlab does not warrant that the image representation through **Qentry** will be free from any errors such as image distortions, color deviations or poor contrast and brightness values. It is the sole responsibility of the customer and any other user, physician or medical physicist involved to anticipate the possibility of such display errors in interpreting images visualized through **Qentry**.

Security

Qentry uses Amazon cloud infrastructure. All user-generated data is stored on servers that are located in secured facilities with 24/7/365 surveillance. The data centers are ISO 27001, SOC 1/SSAE 16/ISAE 3402, and FISMA certified and accredited. The file data is stored within Amazon Web Services AWS (S3), a robust storage service designed for 99.999999999% durability.

- **Qentry** user credentials, account data, and patient data are stored separately for increased security.
- Advanced key management and access control systems ensure that **Qentry** patient data is accessible only to users who own the data.
- All data transmitted is over TLS 128-Bit and stored 256-bit encryption.
- **Qentry** meets both HIPAA and HITECH requirements for PHI (Protected Health Information), and are designed in accordance with European Union Data Protection Directives.

1.3 Symbols

Warnings

Warning

Warnings are indicated by triangular warning symbols. They contain safety-critical information regarding possible injury, death or other serious consequences associated with device use or misuse.

Cautions

Cautions are indicated by circular caution symbols. They contain important information regarding potential device malfunctions, device failure, damage to device or damage to property.

Notes

NOTE: Notes are formatted in italic type and indicate additional useful hints.

1.4 Using the System

Intended Use and Indications for Use/Intended Purpose

Qentry is indicated for image data transfer and online storage of medical images and related data.

Qentry is a web based software for medical professionals that:

- Supports users to build a global clinical network
- Provides an online community to work in virtual groups
- Provides users with tools for secure online image (DICOM) storage, review, transfer and sharing

It is not intended for primary diagnosis, detailed treatment planning or treatment of patients.

Qentry does not have any specific indications for use.

Intended Patient Population

Qentry does not target any specific patient population.

Intended User(s) and Conditions

The device is generally used by medical professionals and medical organization support staff such as doctors, their assistants or nursing staff, within a hospital, a clinic, a doctor's office, or from remote locations, such as at home.

Intended Use Environment

Qentry.com is a pure web application that is accessible from any computer with internet connection.

Plausibility Review

Warning

Before patient treatment, review the plausibility of all information input to and output from the system.

1.5 Compatibility with Software

Compatible Brainlab Medical Software

Only Brainlab medical software specified by Brainlab may be installed and used with the system. Contact Brainlab support for clarification regarding compatibility with Brainlab medical software.

Non-Brainlab Software

Only authorized Brainlab employees may install software on the Brainlab system. Do not install or remove any software applications.

Updates

Warning

Updates to the operating system (hotfixes) or third-party software should be performed outside clinical hours and in a test environment to verify correct operation of the Brainlab system. Brainlab monitors the released Windows hotfixes and will know, for some updates, if problems can be expected. Contact Brainlab support if any problems to operating system hotfixes are encountered.

Virus Scanning and Malware

Brainlab recommends protecting the system with state-of-the-art anti-virus software.

Be aware that some malware protection software (e.g., virus scanner) settings can negatively affect system performance. For example, if real-time scans are performed and each file access is monitored, then loading and saving patient data may be slow. Brainlab recommends disabling real-time scans and performing virus scans during non-clinical hours.

Warning

Ensure that your anti-virus software does not modify any Brainlab directories, specifically:

- C:\Brainlab, D:\Brainlab, F:\Brainlab, etc.
- C:\PatientData, D:\PatientData, F:\PatientData, etc.

Warning

Do not download or install updates during treatment planning.

Contact Brainlab support for further information regarding any of these issues.

Microsoft Security Updates for Windows and Driver Updates

Brainlab allows the installation of security patches only. Do not install service packs and optional updates. Verify your settings to ensure updates are downloaded and installed correctly and at a suitable time. Do not update drivers on Brainlab platforms.

See the Brainlab website for more information about settings and a list of Microsoft Security Updates blocked by Brainlab support.

Address: www.brainlab.com/updates

Password: WindowsUpdates!89

1.6 Training and Documentation

Intended Audience

Qentry.com is aimed at medical professionals (physicians, their staff, nurses etc.) with sufficient understanding of the English technical vocabulary related to the fields of medical physics and medical imaging so as to enable appropriate understanding of the **Qentry.com** user interface.

Responsibility

Warning

This system solely provides assistance to the surgeon and does not substitute or replace the surgeon's experience and/or responsibility during its use. It must always be possible for the user to proceed without the assistance of the system.

Only trained medical personnel may operate system components and accessory instrumentation.

Reading User Guides

This guide describes complex medical software or medical devices that must be used with care. It is therefore important that all users of the system, instrument or software:

- Read this guide carefully before handling the equipment
- Have access to this guide at all times

1.7 Technical Requirements

General

Standard computer with internet connection.

Software

Software	Requirement
Operating system	The following versions or higher: <ul style="list-style-type: none">• Windows 7• MacOS 10
Browser	The following 32 bit versions or higher: <ul style="list-style-type: none">• Internet Explorer 10 (Microsoft Edge is not supported)• Firefox 50.x• Chrome 48• Safari 8 Enable cookies and security settings to allow server requests (Ajax calls).

Hardware

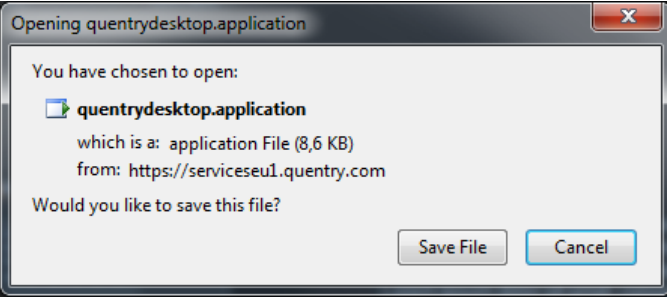

- 2 GB RAM recommended
 - Screen resolution: 1024 x 768 or higher
 - Mouse with scroll wheel recommended
-

Network

- Internet connection with at least 2 Mbit/s
- Firewall with open outbound port 80/443 (http and https)
- Enable WebSockets protocol for the HTML Viewer to use two-way communication.

How to Install Applications from Chrome, Firefox or Other Browsers

When installing a **Qentry** application from a browser other than Internet Explorer, you may be prompted to save a file called `qentrydesktop.application`. When prompted by your browser, perform the following:

Step
<p>1. Save the file to your computer. For example, the following is displayed in Mozilla Firefox:</p> <div data-bbox="619 544 1289 840" data-label="Image"></div> <p>In Google Chrome:</p> <div data-bbox="667 920 1238 967" data-label="Image"></div>
<p>2. Locate the saved <code>.application</code> file.</p>
<p>3. Double-click to proceed with installation.</p>

2 USING QENTRY.COM WEB PORTAL

2.1 Getting Started with the Web Portal

Creating a Qentry Account

To create a **Qentry** account, select **Register** or **Sign up for free** on the **Qentry** home page. Fill in all required text fields. An activation email is sent to you.

*NOTE: If you are within the EU, you are sent an email asking you to read and sign the Data Protection Agreement. When you log in to **Qentry** for the first time, a prompt asks you to confirm that you have printed, read, and signed the agreement.*

*NOTE: If you are from Australia or New Zealand, please select **I am from Australia / New Zealand?**, below the country selection.*

Changing your Password

You are required to change your password by the end of a set period of time. If your password expires, you will be prompted to change it. You will not be able to log in until you do so.

Activation and First Login

Step
1. Select the link in the activation email.
2. Enter your Brainlab ID (provided in the email) and the password you chose when creating the ID.

Step
<p>3. Log in to Qentry using your Brainlab ID and password.</p> <div data-bbox="399 237 1433 938" style="text-align: center;"><p>QUENTRY CLOUD</p><p>Brainlab ID</p><hr/><p>Password</p><hr/><p>LOGIN</p><p>Forgot password? Register I am from Australia / New Zealand</p><p><i>NOTE: If you are from Australia or New Zealand, please select I am from Australia / New Zealand. You will then be redirected to the corresponding login page.</i></p></div>
4. Fill in the required information and select LOGIN .

2.2 Uploading Files to Qentry.com

General Information

This feature enables you to upload files to your **Qentry.com** account. All the files will be uploaded to either:

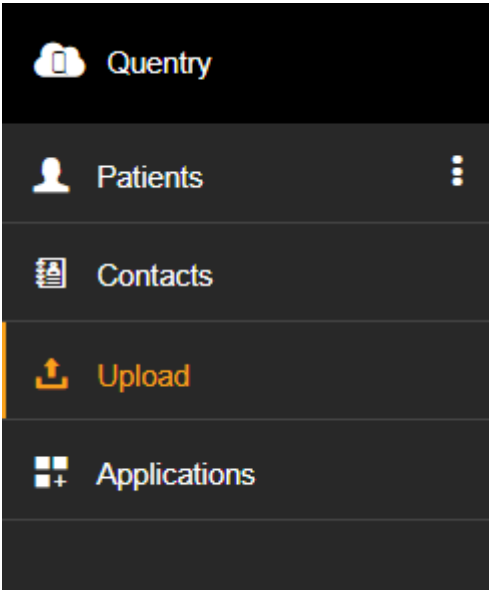

- The currently logged-in user, or
 - A CareTeam or contact if they permit upload.
-

Supported File Formats

You can upload image files and attachments (case notes, reports etc.) in the following formats:

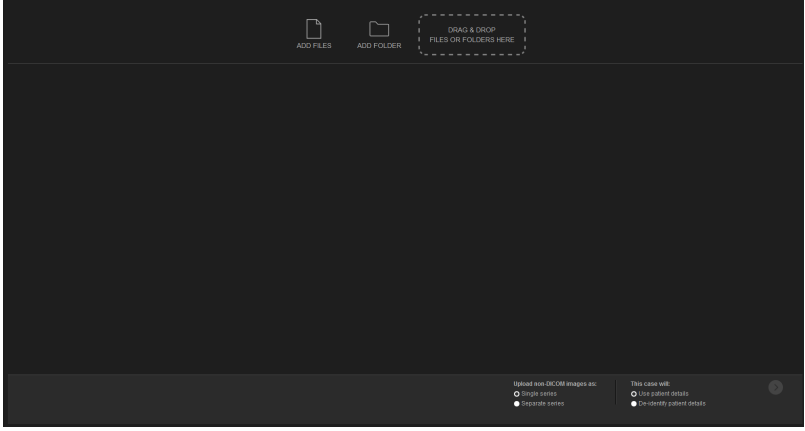

- DICOM
 - PDF
 - DOC
 - JPEG, JPG
 - PNG
 - BMP
 - TXT
 - CSV
 - XML
 - PPT
 - XLS
 - MP4
 - ZIP
 - xBrain folder (can be uploaded using **Qentry Desktop**)
-

How to Start the Uploader

Step
<p>1. Select Upload.</p>  <p>The screenshot shows a dark-themed navigation menu for the Qentry mobile application. The menu items are: 'Qentry' (with a cloud icon), 'Patients' (with a person icon and a three-dot menu icon), 'Contacts' (with a list icon), 'Upload' (with an orange upload icon and a yellow highlight bar to its left), and 'Applications' (with a grid icon).</p>

Step

2. The file selection screen is displayed.

How to Upload Image Sets to Qentry.com

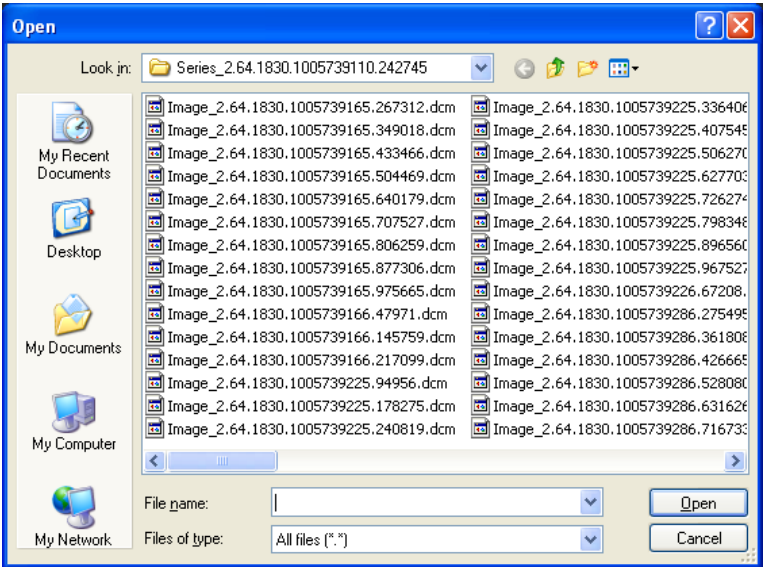

Step

1. In the file selection screen, select the image files you wish to upload. You can either:

- Select **ADD FILES**, or
- Drag the files from a Windows Explorer window into the **DRAG & DROP FILES OR FOLDERS HERE** area.

*NOTE: If you are using Chrome/Firefox as your browser, you also have the option to select the entire contents of a folder to upload by selecting **ADD FOLDER**.*

2. If you select **ADD FILES**, a Windows Explorer window is displayed, enabling you to select files from your computer.

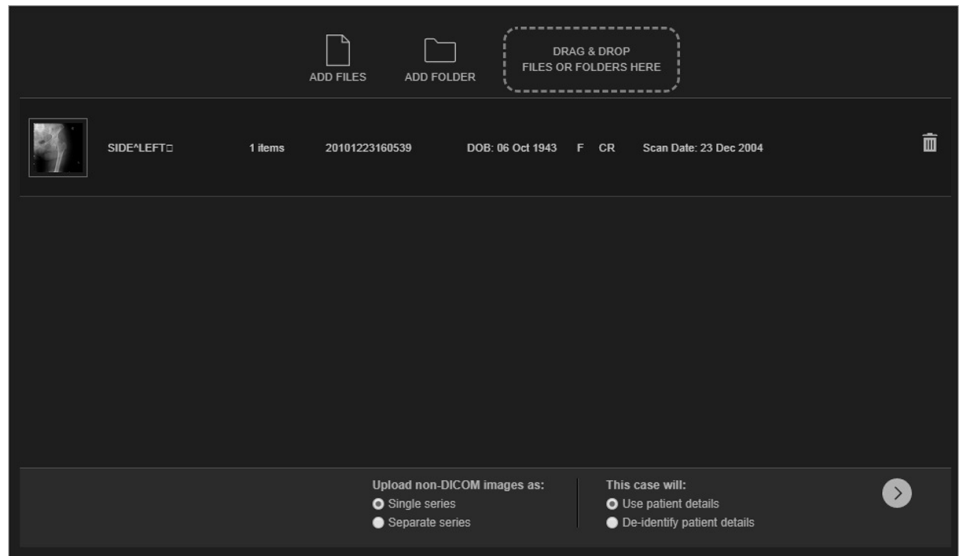

Select one or more files (**CTRL + select multiple files**) to upload and select **Open**.

*NOTE: **CTRL+A** selects all files within this directory.*

Step

3. **Qentry.com** analyzes the files you have chosen.
A summary of the selected patient files is displayed.

To remove files from the uploader, select the corresponding trash can icon.

You can add more files by selecting **ADD FILES**, **ADD FOLDER** or by dragging files from a window to **DRAG & DROP FILES OR FOLDERS HERE**.

- 4.

Choose how to upload any non-DICOM images (e.g., as a single series, or separate series).

- 5.

Next, decide whether to de-identify the patient data.

Select how to upload patient data by activating one of the radio buttons:

- **Use patient details:** Shows patient details
- **De-identify patient details:** Removes patient details. If you select this option, you must also select the check box to confirm that all patient data has been removed.

Qentry can remove DICOM metadata from the files. If, for example, the patient's name or other detail is written directly onto the image, **Qentry.com** cannot remove it. By activating the check box confirming that the patient data has been removed, you are confirming that all such information has been deleted.

Step

6.

Select a folder on **Qentry.com** where the image files will be stored.

To create a new folder, select **New Patient Folder**. Patient details are taken from the DICOM data, unless:

- You chose to upload the files de-identifying patient details, or
- You are uploading a JPEG file without DICOM data.

In these cases, you must provide details to identify the new folder (if you have chosen to upload the patient records as de-identified, a de-identified name is suggested but can be changed).

If you choose to store the images in an **Existing Patient Folder**, you must search for and select which folder to use.

NOTE: To add images to an existing patient folder, you must either have uploaded data to it previously or share a data set with the right to upload data.

7. **Qentry.com** provides you with the option to upload to an account other than **Myself** if:

- You are a member of a CareTeam, or
- You have contacts who permit you to upload to their account.

Select who will have ownership of the data you are uploading. If the data is given to a CareTeam account, each member of the team will be able to see and share the data. Sharing applies not only to an individual image, but also to the whole patient folder (which can contain multiple studies, series and files). Responsibility rests on the user to share images only with colleagues who are allowed to see this patient's data.

Step							
8.	<p>Adding tags to folders: If you upload to Myself or to a CareTeam of which you are a member, you can add folder tags during the upload process.</p> <ul style="list-style-type: none"> • Upload to Myself: You can use existing tags or create new ones. • Upload to a CareTeam: You can use the CareTeam's predefined tags. 						
9.	<p>Select the check box once you have obtained the patient's consent to upload the image set.</p> <div style="background-color: #333; color: white; padding: 10px; border: 1px solid #ccc;"> <input checked="" type="checkbox"/> I have the patient consent (or other legal basis) to store and share his/her data on quentry.com  Finish and Upload </div>						
10.	<p>Select Finish and Upload to upload the images to Quentry.com.</p>						
11.	<div style="background-color: #333; color: white; padding: 10px; border: 1px solid #ccc;"> <p>Uploaded successfully 1 of 1 files , 0 failed</p> <div style="display: flex; justify-content: space-between;">  View uploaded files  Upload more files </div> <hr style="border: 1px solid orange;"/> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center;"></td> <td style="text-align: center;">Tibial Plate</td> <td style="text-align: center;">1 items</td> <td style="text-align: center;">TC_anon_TibialPlate</td> <td style="text-align: center;">M CR</td> <td style="text-align: right; vertical-align: middle;">✓</td> </tr> </table> </div> <p>Once the upload process is complete, a message is displayed if there were any problems with a file.</p> <p>You can then choose to:</p> <ul style="list-style-type: none"> • Upload more image sets • View uploaded images • Continue with other options 		Tibial Plate	1 items	TC_anon_TibialPlate	M CR	✓
	Tibial Plate	1 items	TC_anon_TibialPlate	M CR	✓		

2.3 Viewing Uploaded Files

General Information

You can view and work with image sets that have been uploaded by you or shared with you by a contact or through a CareTeam.

You can also launch applications such as:

- **Quentry Viewer**
- **TraumaCad**

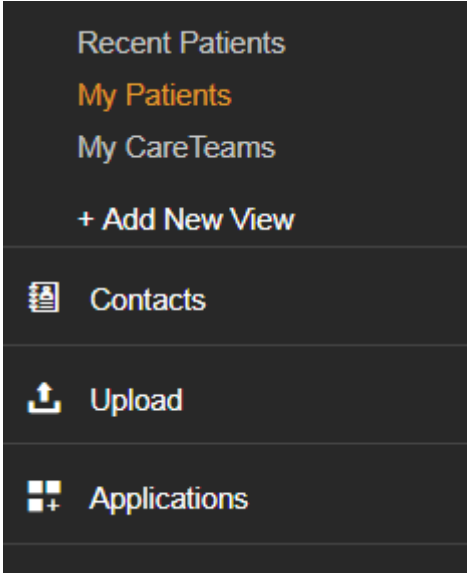

You can access uploaded data from your iPad/iPhone using **Quentry Mobile**.

For more details on these applications, please refer to the relevant user guide.

How to View Uploaded Image Sets

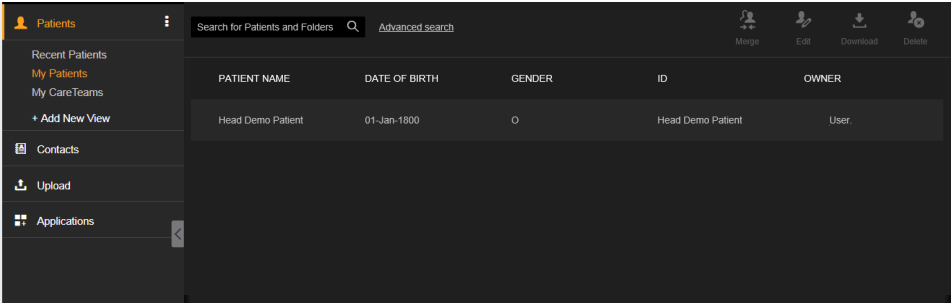

Step

1. Under **Patients**, select **My Patients**.

The screenshot shows a dark-themed mobile application menu. The options listed are: 'Recent Patients', 'My Patients' (highlighted in orange), 'My CareTeams', '+ Add New View', 'Contacts' (with a folder icon), 'Upload' (with an upload icon), and 'Applications' (with a grid icon).

2. A list of your available patients is displayed.

The screenshot shows the 'Patients' screen in the mobile application. On the left is a sidebar menu with options: 'Recent Patients', 'My Patients' (selected), 'My CareTeams', '+ Add New View', 'Contacts', 'Upload', and 'Applications'. The main area displays a table with the following data:

PATIENT NAME	DATE OF BIRTH	GENDER	ID	OWNER
Head Demo Patient	01-Jan-1800	O	Head Demo Patient	User

Warning

After you have opened a data set in the viewer, additional images can be added to the study by another user. Refresh to see all images in the data set and reopen the data set.

How to Refine Your Image Set List

Options
To view patients you have interacted with recently, select Recent Patients .
To view only the patients you have uploaded or that were shared by a contact, select My Patients .
To view only the patients shared by a CareTeam, select My CareTeams .
To search for a particular patient folder, enter part of the patient's name in the search field.

- Refine the search by selecting the arrow.
- This provides options to focus the search:

ADVANCED SEARCH ✕

Patient ID <input style="width: 90%;" type="text"/>	Referring Physician <input style="width: 90%;" type="text"/>

How to Switch Between Patients List and Folders List

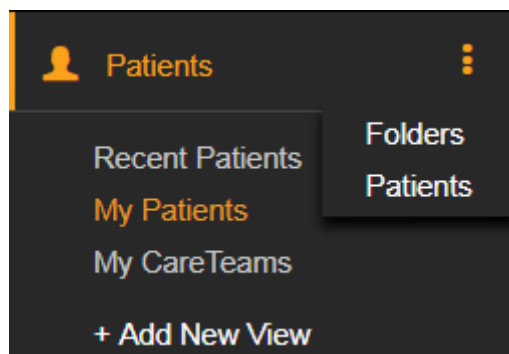

Figure 1

To switch between **Patients** list and **Folders** list, select the three dots icon and select the mode that you want to work with.

- In **Patients** list mode, you will see a list of patients (based on search or **View** criteria). You then select a patient in order to see the folders.
- In **Folder** list mode, you will see a list of folders (based on search or **View** criteria). You then select a folder to view its content.
- Each mode offers a different set of toolbar actions.

How to View Patient Folders

Figure 2

In **Patients** list mode, a list of patients is shown.

To select a patient and see the folders, you can either:

- Select the patient name in the table, or
- Select the row and select **Next**.

This redirects you to the selected patient's folders.

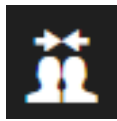

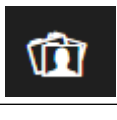

Folders List Mode

In **Folders** list mode, you see a list of folders.

NOTE: If there is only one patient folder, the folder is automatically selected.

*NOTE: You can select one or more folders by using **CTRL** + right mouse click.*

Software Functions

Options	Icon	Function
To edit a patient's details,		select the edit icon.
To merge two patient records into one,		select the merge icon.
To view images,		select the view icon, available on folder level and also on selected items level.
To start TraumaCad ,		select the TraumaCad icon, available on folder level. <i>NOTE: Only available if license assigned.</i>

Options	Icon	Function
To share the folder and/or change the sharing permissions among your selected contacts, and/or change the folder owner,		select the share icon, available on the folder level. <i>NOTE: This is only available for patient folders that you own.</i> <i>NOTE: To change the ownership, select Change Owner and select one of your contacts.</i>
To download the record files to a local drive (depending on the sharing rights),		select the download icon, available on folder level, for a new patient and also on selected items level.
To create a new tag to label patient folders,		select the tag icon.
To delete a patient folder,		select the delete icon.

Components

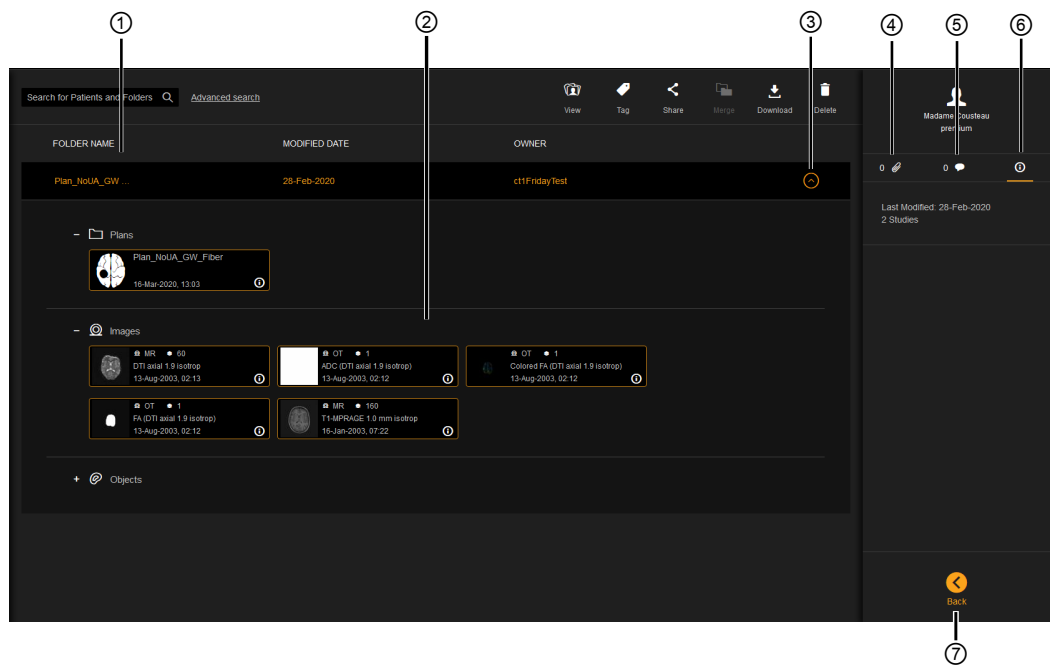

Figure 3

No.	Description
①	Available folders.
②	Folder contents, including the uploaded DICOM plan, image series, DICOM segmentation objects.
③	Select the arrow to view the folder content.
④	View the uploaded attachments. Attachments can be downloaded or deleted.
⑤	Write new comments or view previous ones.

No.	Description
⑥	Select to view: <ul style="list-style-type: none"> • The last time the folder was modified • How many studies are in the folder • With whom the folder is shared (as long as you are the owner or a CareTeam member of the folder)
⑦	Select to go back to patient list.

Working with Folders

When you select a folder, a collapsible view of its component parts is displayed. The components of a folder are: plan, images, objects, other. Each section is defined by a DICOM tag. Each item represents a DICOM entity, (e.g., one series, one object).

If you select a plan, all contents of the plan are automatically selected. If you unselect one item of a plan, the plan is also deselected.

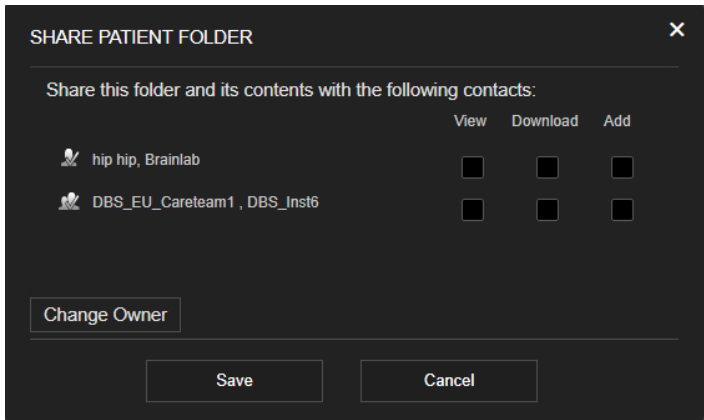

If you select an object, the image series to which the object belongs is also selected.

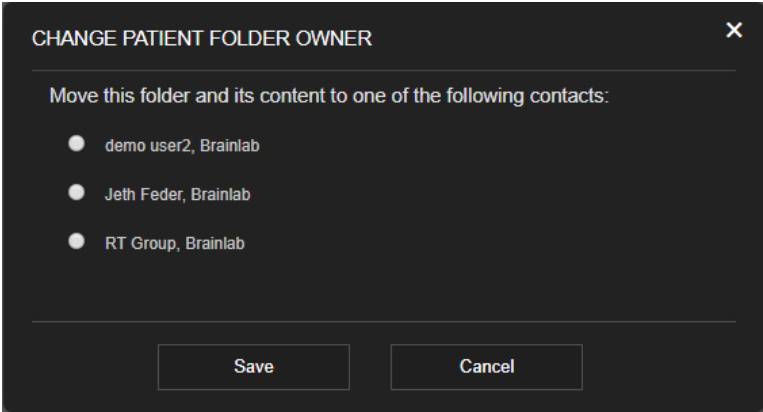

A folder can contain different patients. Each patient's data is listed as a separated section under the folder.

Select the **Merge Folder** to merge the contents of two folders together.

How to Share an Image Set with a Contact

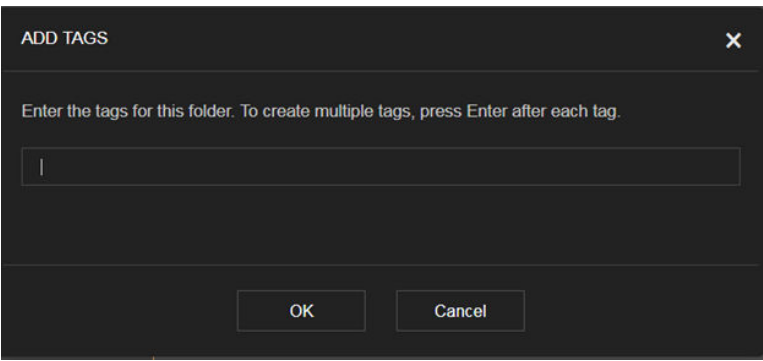

Share image sets with contacts or CareTeams.

Step
1. Select the folder that you want to share.
2. Select Share . A dialog provides a list of your contacts and CareTeams.

3. Select check boxes to enable the contact to: <ul style="list-style-type: none"> • View your image sets • Download your image sets • Add their own image sets <p>Sharing applies not only to an individual image, but also to the whole folder. Responsibility rests on the user to share folders only with colleagues that are allowed to see this patient's data.</p>
4. If you wish to move a patient folder to a specific contact, select the folder that you want to move.

Step
<p>5. Select Share, then select Change Owner. A dialog provides a list of your contacts and your CareTeams.</p> <div style="text-align: center; margin: 10px 0;">  </div>
<p>6. Select the new owner, then select Save.</p>

How to Create Tags and Add Them to an Image Set

You can add tags to data to help you update or search the data. Tags can be applied on folder level.

Step
<p>1. Select Tag. A dialog opens.</p> <div style="text-align: center; margin: 10px 0;">  </div>
<p>2. Enter the desired tag text. As you type, a dropdown with available matching tags will be shown. You can select an existing tag or create a new one.</p>
<p>3. The chosen tag is added to the image set as a label. Multiple tags are possible.</p>

How to View and Add Comments

Step
<p>1. You can view any comments attached to a patient folder, and add your own by selecting the comments icon.</p> 
<p>2. To enter a comment, type into the field provided.</p>
<p>3. To save the comment, select the arrow icon or press Enter.</p>

If you select a comment, you can choose the options to **Edit** or **Delete** it.

How to Add a New View

You can create a new view that enables you to customize which records are displayed according to your own criteria. For example, if you have created a tag for certain patient folders, you can create a view of all sets that are labeled with that tag.

Step
<p>1. Select Add New View.</p> 

Step

2. Select the criteria for refining your view of the data from the options available and select **OK**.

ADD NEW VIEW [X]

NOTE: You can edit or delete your customized view by hovering over it with the mouse pointer and selecting the appropriate button.

2.4 Connecting to Qentry Contacts

General Information

Qentry.com enables you to work with medical professionals around the world to discuss and share patient folders and other information.

How to Start Connecting

Step
<p>1. Select Contacts.</p> 
<p>2. When you select Contacts the first time, a prompt informs you that you, as a user, will be visible to other users on Qentry by default.</p>  <p>You can change this setting in User Settings. Select OK to proceed.</p>
<p>3. The contacts screen is displayed.</p> 

2.5 Managing Your Qentry.com Contacts

Managing your Contact List

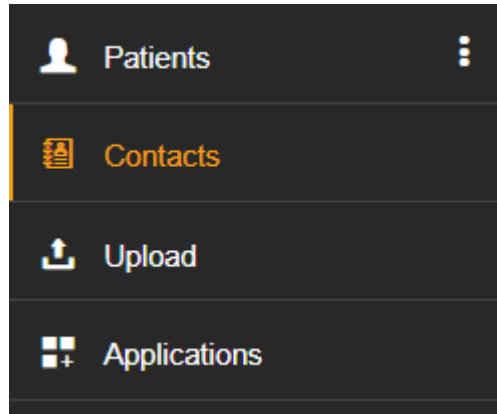

Figure 4

You can see your contacts by selecting **Contacts** from the menu. **MY CONTACTS** is displayed.

Options
Select Allow Upload to permit a contact to upload image sets to your account.
Select Remove Contact to remove a contact from your list. The removed contact does not receive a notification.

Invite a Colleague to Join Qentry

You can invite a colleague to join **Qentry**. You can also make the invitee your contact by selecting the **Add as Contact** check box.

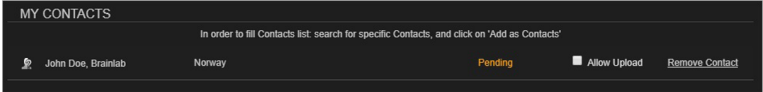

The invitee will receive an email on your behalf, and should then follow the instructions in the email.

How to Add a Qentry.com Contact

Step
<p>1. Search for an existing Qentry.com user by entering an appropriate detail in the search field in the contacts screen. You can enter part of their:</p> <ul style="list-style-type: none"> • Brainlab ID • First name and surname <p>Qentry.com displays a list of possible matches.</p> <div data-bbox="564 1720 1326 1809" data-label="Image"> A screenshot of a search results interface. It shows a search bar at the top with the text 'jo' and a magnifying glass icon. Below the search bar, there is a result card for 'John Doe, Brainlab' with 'Norway' listed below it. To the right of the result card is a button labeled 'Add as Contact'. </div>

Step

2. Select **Add as Contact** for that person to become your contact.
Qentry.com sends a notification to this user, who must accept your request before becoming a contact. Once the request is sent, the contact status is shown as **Request sent** until the next screen refresh. After that it is shown as **Pending**.

How to Accept Contact Notifications

Figure 5

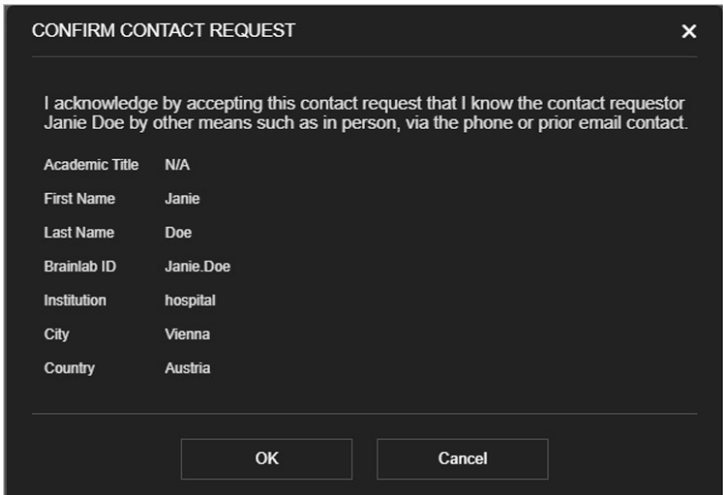

When a **Qentry.com** user requests that you become their contact, you receive a new notification, indicated in the toolbar:

Step

1. To see details of the request, select **Notifications**.

2. You can **Accept** or **Decline** the request.
3. You are prompted to confirm that you know this contact by a means other than **Qentry**. If that is the case, select **OK** to complete the request.

3 MANAGING YOUR ACCOUNT

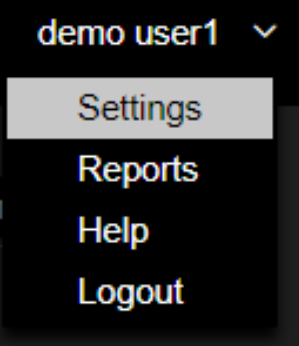

3.1 Managing your User Profile

General Information

You can view and manage your user and account information in the **Settings** screen.

How to Access the Profile Screen

Step
1. Select Settings under your Brainlab ID.

The image shows a screenshot of a user profile dropdown menu. At the top, it displays 'demo user1' with a downward arrow. Below this, there is a list of options: 'Settings' (highlighted with a grey background), 'Reports', 'Help', and 'Logout'.

Step

2. The **USER DETAILS** screen is displayed.

USER DETAILS

Academic Title	
First Name	John

3.2 Updating Your User Information

Changing Your User Settings

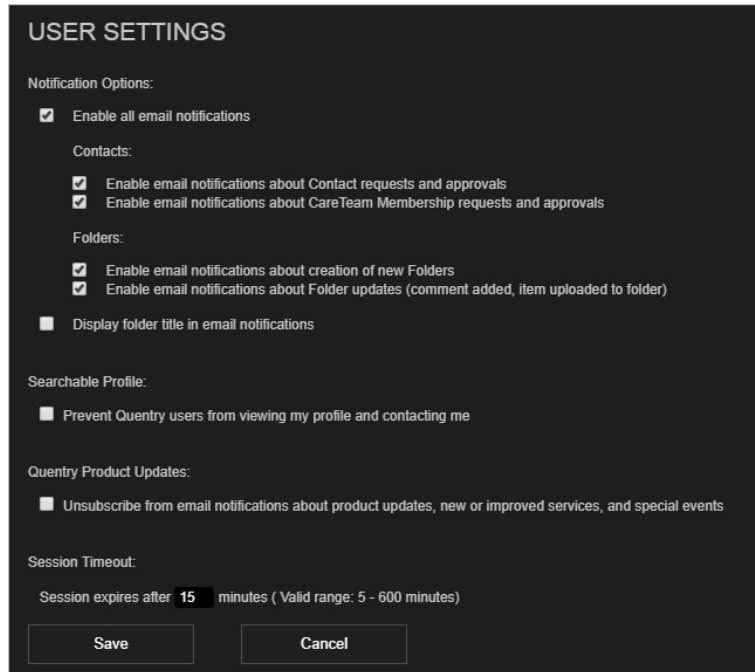

Figure 6

You can change your user settings on the **USER SETTINGS** screen:

Setting	Description
Notification Options	Enables all email notifications with the option to deselect the following conditions:
Contacts	<ul style="list-style-type: none"> • Enable email notifications about Contact requests and approvals • Enable email notifications about CareTeam Membership requests and approvals
Folders	<ul style="list-style-type: none"> • Enable email notifications about creation of new Folders • Enable email notifications about Folder updates (comment added, item uploaded to folder)
Display folder title in email notifications	Choose whether to display the patient folder title in the email notifications that are sent on your behalf. In both cases (displayed or not), a URL to the relevant folder is included in the email.
Searchable Profile	Choose whether Qentry users can view your profile and contact you.
Qentry Product Updates	Unsubscribe from email notifications about product updates, new or improved services, and special events Choose whether to receive marketing-related emails from Brainlab.
Session Timeout	Set a period of time (between 5 and 600 minutes) that the system remains active while left idle before timing out.

How to Change Your Password

New passwords must be at least eight characters in length, and contain at least one:

- Lowercase letter

- Uppercase letter
- Digit

Step
1. To change your password, select Change Password from the Settings screen.
2. Follow the steps on the screen.
3. Select Change to continue.

How to View Your Subscription Details

Step
Select Subscription Details from the Settings screen. You can find information about: <ul style="list-style-type: none">• Your Qumentry.com membership• Your Qumentry.com storage space• Your licensed applications

How to Change Your User Details

You can change the details that were set during your first **Qumentry.com** login. This includes, among other things, your:

- Address
- Email address
- Institution

Step
1. Select User Details in the Settings screen.
2. Change any details in the fields displayed.
3. When you are finished, select Save .

3.3 Viewing Your Account Information

General Information

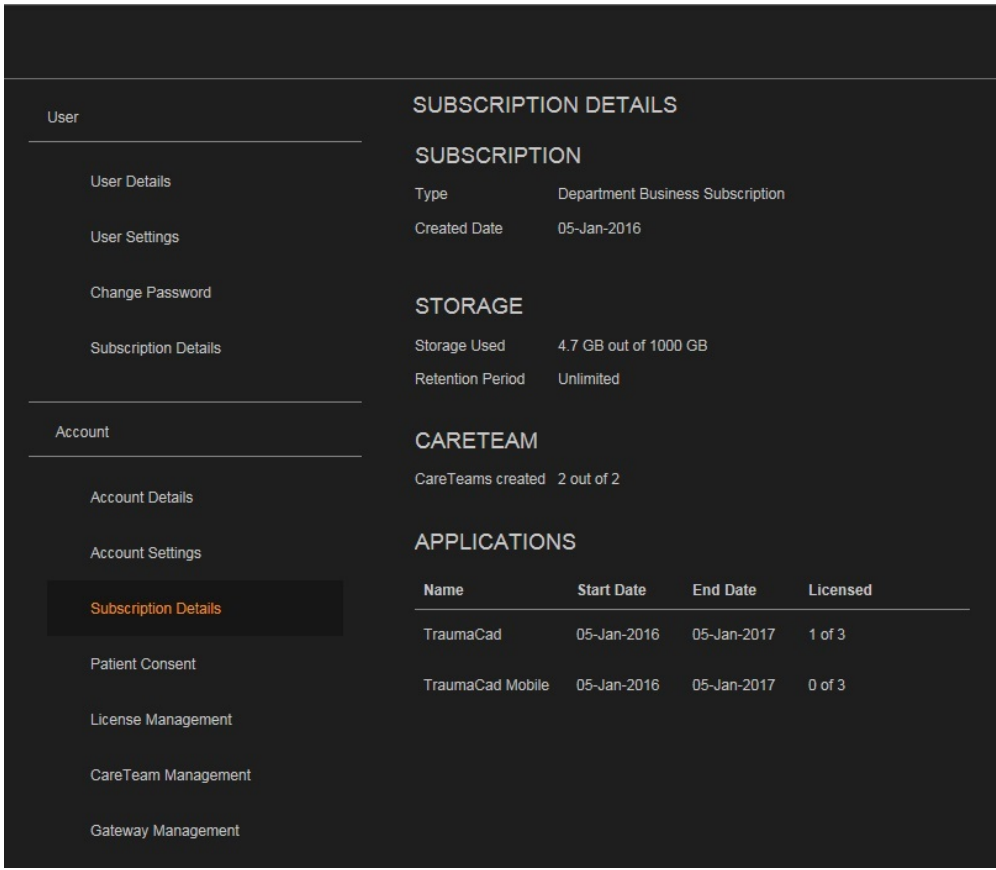

You can administer accounts if you have the appropriate license.

How to View Account Information

Step
Select Account Details in the Settings screen.

How to Manage Account Subscriptions

You can view your use of **Quentry.com** and grant licenses to your users to make use of **Quentry.com** services.

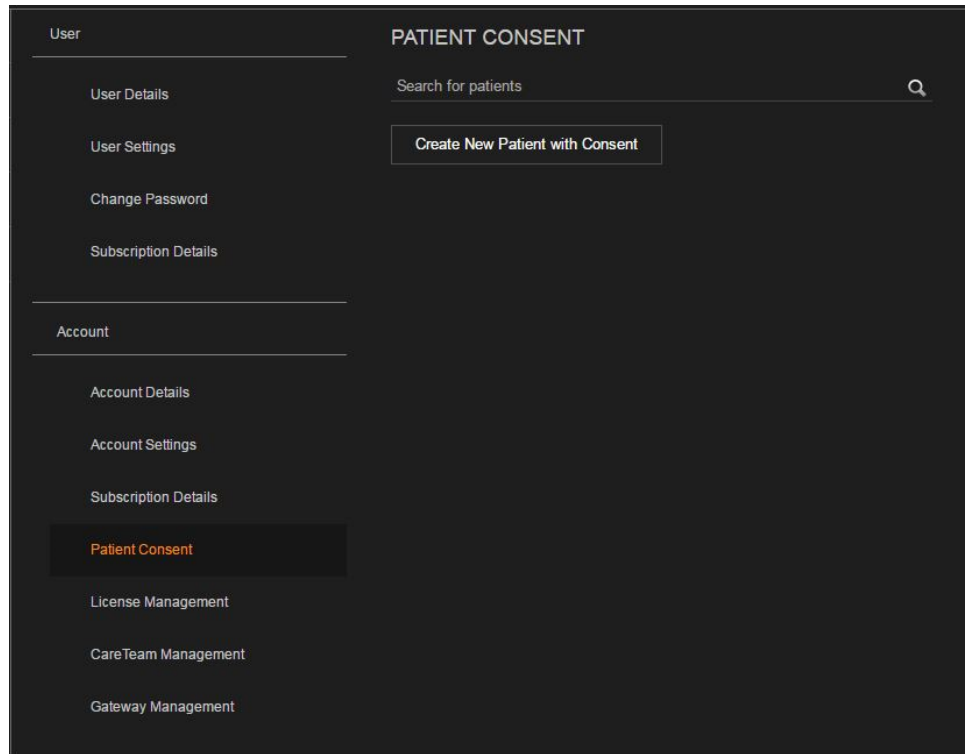

Step													
Select Subscription Details to display information.													
 <p>The screenshot shows a dark-themed user interface. On the left is a navigation menu with sections: 'User' (containing User Details, User Settings, Change Password, Subscription Details), 'Account' (containing Account Details, Account Settings, Subscription Details, Patient Consent, License Management, CareTeam Management, Gateway Management). The 'Subscription Details' option is highlighted in orange. The main content area is titled 'SUBSCRIPTION DETAILS' and contains three sections: 'SUBSCRIPTION' (Type: Department Business Subscription, Created Date: 05-Jan-2016), 'STORAGE' (Storage Used: 4.7 GB out of 1000 GB, Retention Period: Unlimited), and 'CARETEAM' (CareTeams created: 2 out of 2). Below these is an 'APPLICATIONS' table:</p> <table border="1"> <thead> <tr> <th>Name</th> <th>Start Date</th> <th>End Date</th> <th>Licensed</th> </tr> </thead> <tbody> <tr> <td>TraumaCad</td> <td>05-Jan-2016</td> <td>05-Jan-2017</td> <td>1 of 3</td> </tr> <tr> <td>TraumaCad Mobile</td> <td>05-Jan-2016</td> <td>05-Jan-2017</td> <td>0 of 3</td> </tr> </tbody> </table>		Name	Start Date	End Date	Licensed	TraumaCad	05-Jan-2016	05-Jan-2017	1 of 3	TraumaCad Mobile	05-Jan-2016	05-Jan-2017	0 of 3
Name	Start Date	End Date	Licensed										
TraumaCad	05-Jan-2016	05-Jan-2017	1 of 3										
TraumaCad Mobile	05-Jan-2016	05-Jan-2017	0 of 3										

How to Add Patient Consent

Patients must be informed about how their data and images will be stored, preserved, shared and used and consent must be obtained.

Step

1. Under **PATIENT CONSENT**, select **Create New Patient with Consent**.

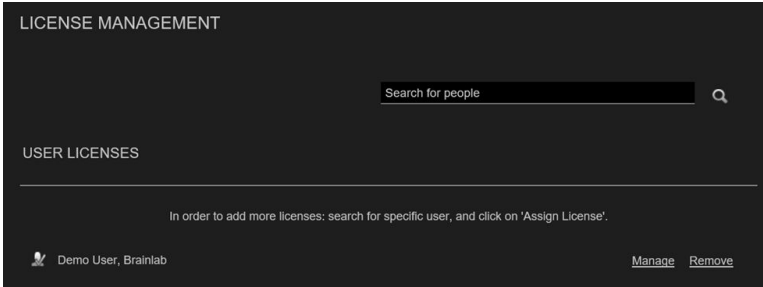

2. Fill out all the patient details and select the check box to confirm a signed, informed consent exists.

The screenshot shows a dialog box titled 'CREATE NEW PATIENT WITH CONSENT' with a close button (X) in the top right corner. The form contains the following fields: 'Patient Full Name:' with a text input field; 'Patient ID:' with a text input field; 'Patient Gender:' with a dropdown menu currently set to 'Male'; and 'Patient Date of Birth:' with a date picker. Below these fields is a checkbox labeled 'I confirm that a signed informed consent exists for this patient'. Underneath the checkbox is a note in orange text: 'Please note: patient details should appear exactly as they appear in patient's DICOM images'. At the bottom of the dialog are two buttons: 'OK' and 'Cancel'.

3. In the list of patients under **PATIENT CONSENT**, you can:
 - Withdraw this consent by selecting **Remove Consent**.
 - Add consent to an existing patient by selecting **Add Consent**.

How to Grant Users Access for an Application

Step
<p>1. In LICENSE MANAGEMENT, search for a user by name, then select Manage next to Brainlab ID.</p> <div data-bbox="571 465 1337 750" data-label="Image"></div>
<p>2. To give the user access to a specific application or licensed feature, select the check box next to it.</p>
<p>3. Select Save to continue.</p>

4 USING QUENTRY.COM CARETEAMS

4.1 Qentry.com CareTeams

General Information

Every user receives an individual account in **Qentry**. A CareTeam is created by subscribing to a **Qentry** hospital account that includes the CareTeam feature. CareTeams are a virtual workspace for members. With permission, other **Qentry** users can share data with or send data to CareTeams. CareTeams allow users to pool information.

CareTeam Roles

Role	Description
Qentry user	<ul style="list-style-type: none"> • Any person who has a Qentry account • Can become a CareTeam administrator • Can become a CareTeam member • Can become a contact of another Qentry user
Business account administrator	<ul style="list-style-type: none"> • Can create a CareTeam • Can be a CareTeam administrator • Can become a CareTeam member or contact
CareTeam administrator	<ul style="list-style-type: none"> • Determined by CareTeam owner • Manages CareTeam
CareTeam member	<ul style="list-style-type: none"> • Any Qentry user can become a member of a CareTeam by one of the following ways: <ul style="list-style-type: none"> - Receiving an invitation from the CareTeam, or - Requesting to join the CareTeam. • Automatically sees all CareTeam data with the ability to upload • Can be assigned other CareTeam access rights if enabled by CareTeam administrator: <ul style="list-style-type: none"> - Download - Edit Patient - Change Owner - Manage

Role	Description
CareTeam Contact	<ul style="list-style-type: none"> • Any Qentry user can become a contact associated with a CareTeam by one of the following ways: <ul style="list-style-type: none"> - Receiving an invitation from the CareTeam, or - Requesting to be added as one. • Can only view CareTeam data that has been shared • Will be able to upload data to CareTeam if Upload rights were enabled by CareTeam administrator • Can exchange data with CareTeam

4.2 CareTeam Administration

General Information

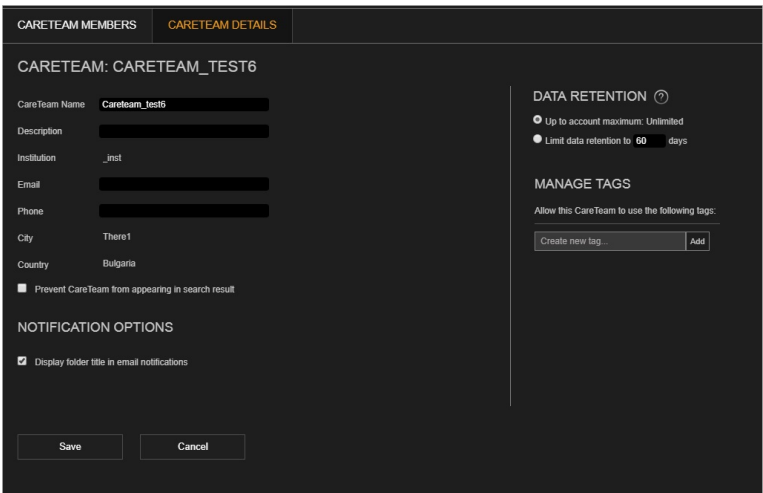

Only business account administrators can access the **CareTeam Management** functions in the **Settings** screen.

How to Create a New CareTeam

A CareTeam enables users to pool information. This feature is only available if you possess the license for it.

Step
1. Select CareTeam Management in the Settings screen.
2. Select Create CareTeam . You are prompted to enter a name for the new team.
3. Select Save .

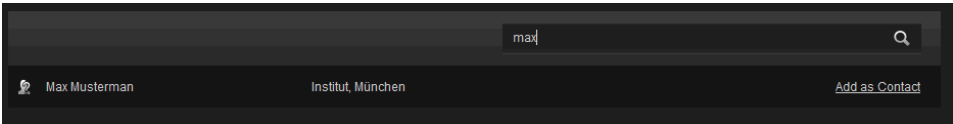

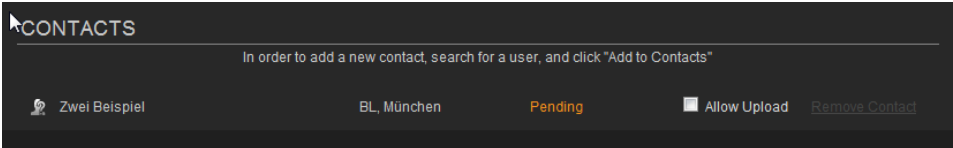

How to Administer a CareTeam (Business Account Administrators)

Step
1. Select CareTeam Management in the Settings screen.
2. All existing teams are shown. To view the CareTeam details and members, select Manage . Information about that CareTeam is displayed.

3. To change the name or other details, fill in the fields and select Save .
4. Under MANAGE TAGS , select Add to add new tags that the CareTeam can use to categorize data.

Step
<p>5. To adjust a member's rights, select CARETEAM MEMBERS, then select the corresponding check box to enable them to:</p> <ul style="list-style-type: none"> • Download image sets • Edit Patient details • Change Owner of a CareTeam folder to another CareTeam contact • Manage the CareTeam itself. This enables this user to: <ul style="list-style-type: none"> - Add/remove members - Grant rights to members

How to Add a Contact to a CareTeam

A CareTeam contact can view files shared with the CareTeam.

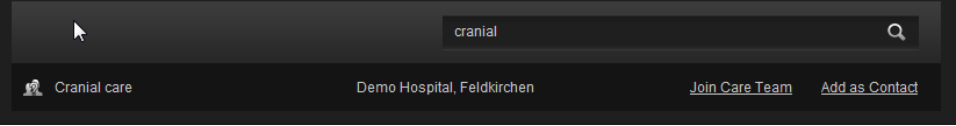

Step
<p>1. Search for an existing Qentry.com user by entering an appropriate detail in the search field under CareTeam Management. You can enter part of the:</p> <ul style="list-style-type: none"> • Brainlab ID • First name and surname <p>Qentry.com displays a list of possible matches:</p> 
<p>2. Select Add as Contact to request a person on the list become a contact. Qentry.com sends a notification to this user, who must accept your request before becoming a contact. While the request is pending, the contact status is shown as Pending in the CareTeam Management Contacts list.</p>  <p><i>NOTE: To allow this contact to upload image files to the CareTeam, select the check box.</i></p>

4.3 CareTeam Use

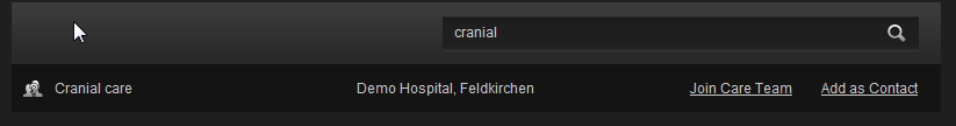

General Information

Use CareTeam to share and manage information.

How to Join a Qentry.com CareTeam

Step
<p>1. Search for an existing Qentry.com CareTeam by entering part of its name in the search field in the Contacts screen:</p>  <p>The screenshot shows a search bar with 'cranial' entered. Below the search bar, a result card is displayed with the text 'Cranial care' and 'Demo Hospital, Feldkirchen'. To the right of the card are two buttons: 'Join Care Team' and 'Add as Contact'.</p>
<p>2. Select Join CareTeam to request to join the team. Qentry.com sends a notification to the administrator of the CareTeam, who must accept your request before you can join. While the request is pending, the contact status is shown as Request sent.</p>

How to Add a Qentry.com CareTeam as a Contact

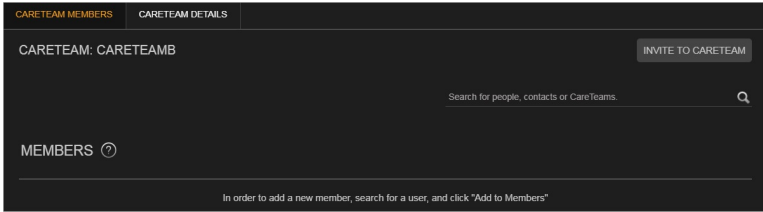

Step
<p>1. Search for an existing Qentry.com CareTeam by entering part of its name in the search field in the Contacts screen:</p>  <p>The screenshot shows a search bar with 'cranial' entered. Below the search bar, a result card is displayed with the text 'Cranial care' and 'Demo Hospital, Feldkirchen'. To the right of the card are two buttons: 'Join Care Team' and 'Add as Contact'.</p>
<p>2. Select Add as Contact. Qentry.com sends a notification to the administrator of the CareTeam, who must accept your request before you are added as a contact. While the request is pending, the contact status is shown as Request sent.</p>
<p>3. Once your request has been accepted, you become a contact of the CareTeam and appear under its Contacts section.</p>

How to Invite a Colleague to Join Qentry and Become a CareTeam Member

A CareTeam member with manage permissions can invite a colleague to join **Qentry** and become a member of that CareTeam.

Step

1. Select **INVITE TO CARETEAM** from the **CARETEAM MEMBERS** screen.

The screenshot shows a dark-themed interface with two tabs: 'CARETEAM MEMBERS' (active) and 'CARETEAM DETAILS'. Below the tabs, the text 'CARETEAM: CARETEAMB' is displayed. To the right, there is a button labeled 'INVITE TO CARETEAM'. Below this, there is a search bar with the placeholder text 'Search for people, contacts or CareTeams.' and a magnifying glass icon. At the bottom, there is a section labeled 'MEMBERS' with a downward arrow icon and a note: 'In order to add a new member, search for a user, and click "Add to Members"'

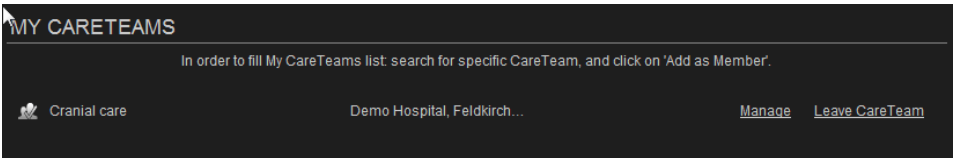

2. Fill in your colleague's details and select **INVITE TO CARETEAM**.
The invitee will receive an email on your behalf and should then follow the instructions in the email.

How to Manage a CareTeam (CareTeam Administrators)

You can manage an existing CareTeam if an existing administrator has given you this right.

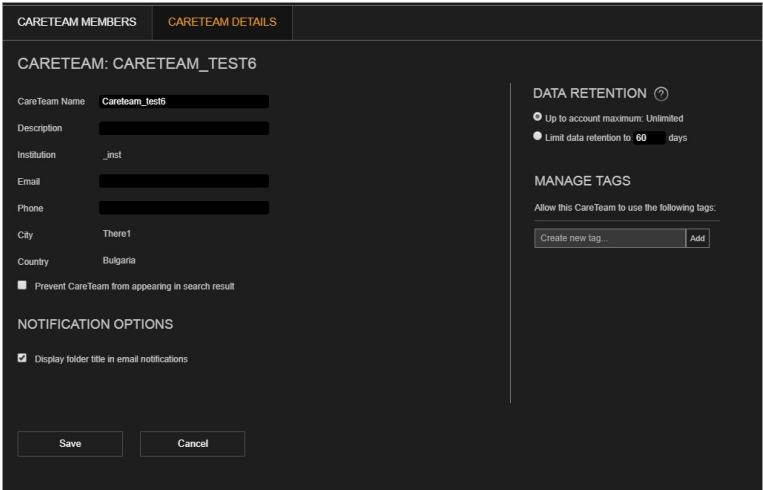

Step

1. Search for an existing **Quentry.com** CareTeam by entering part of its name in the search field in the **Contacts** screen.

The screenshot shows a dark-themed interface with the title 'MY CARETEAMS'. Below the title, there is a search bar and a note: 'In order to fill My CareTeams list: search for specific CareTeam, and click on "Add as Member"'. Below this, there is a list of CareTeams. The first entry is 'Cranial care' with a profile icon, followed by 'Demo Hospital, Feldkirch...' with a location pin icon. To the right of the second entry, there are two links: 'Manage' and 'Leave CareTeam'.

2. All matching teams are shown. To view the CareTeam details and members, select **Manage**.

The screenshot shows a dark-themed interface with two tabs: 'CARETEAM MEMBERS' and 'CARETEAM DETAILS' (active). Below the tabs, the text 'CARETEAM: CARETEAM_TEST6' is displayed. The main content area is divided into several sections:

- CareTeam Name:** Careteam_test6
- Description:** [Redacted]
- Institution:** _inst
- Email:** [Redacted]
- Phone:** [Redacted]
- City:** Theres1
- Country:** Bulgaria
- Prevent CareTeam from appearing in search result
- DATA RETENTION:**
 - Up to account maximum: Unlimited
 - Limit data retention to 60 days
- MANAGE TAGS:**

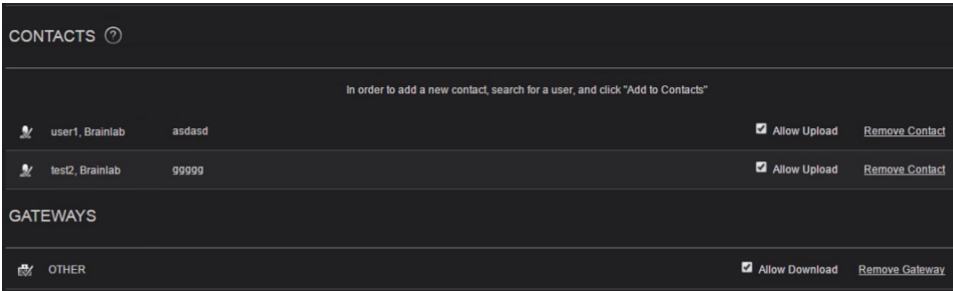

Allow this CareTeam to use the following tags:
- NOTIFICATION OPTIONS:**
 - Display folder title in email notifications

 At the bottom, there are two buttons: 'Save' and 'Cancel'.

3. To adjust a member's rights, select the corresponding check boxes to enable them to:
 - **Download** image sets
 - **Edit Patient** details
 - **Change Owner** of a CareTeam folder to another CareTeam contact
 - **Manage** the CareTeam itself. This enables this user to:
 - Add/remove members
 - Grant rights to members

How to Enable Download from Quentry.com

You can enable image download from **Quentry** under **GATEWAYS**.

Step	
<p>1. Select Allow Download to permit downloading image sets from Quentry.</p>	 <p><i>NOTE: If the CareTeam was not set as the default recipient in the Gateway configuration, you can search for the Gateway and add it. Once confirmed, it is added and appears under My Gateways in the Contacts screen.</i></p>
<p>2. Select Remove to remove an entry from your list.</p>	

4.4 Managing Your Gateway

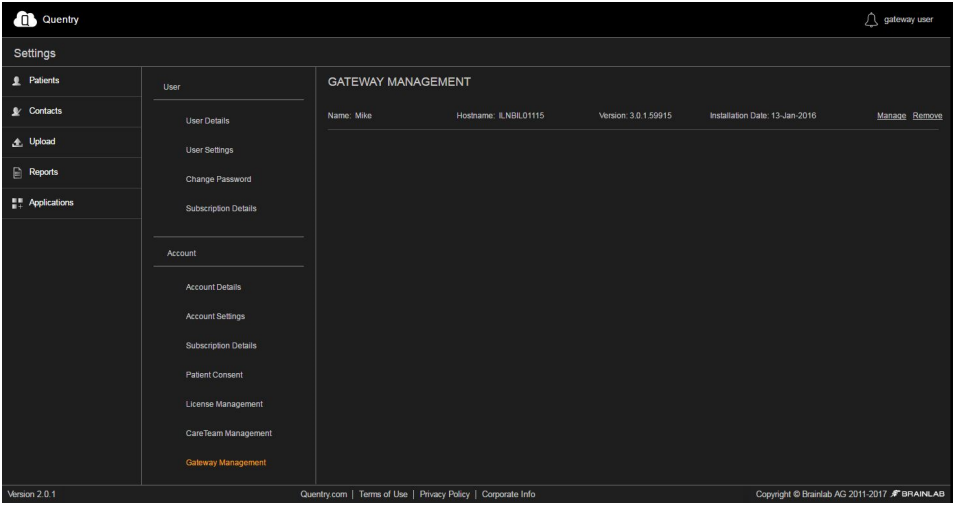

General Information

You can administer access to a **Qquery Gateway** if you have the appropriate license.

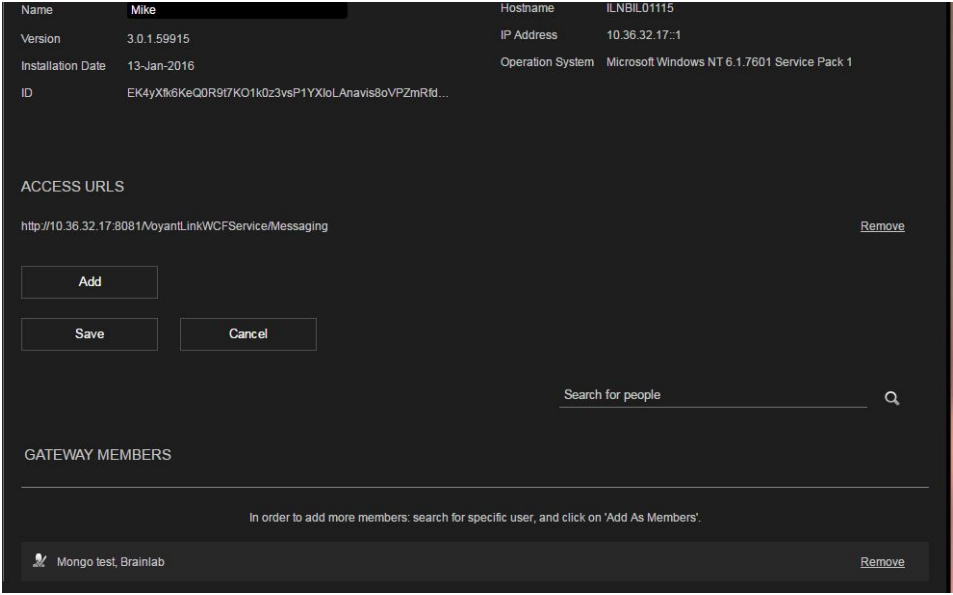

How to Manage a Gateway

Step

- Select **Gateway Management** in the **Settings** screen.
A list of gateways is displayed.

The screenshot shows the 'Settings' interface with a sidebar on the left containing options like Patients, Contacts, Upload, Reports, and Applications. The main area is titled 'GATEWAY MANAGEMENT' and displays a table with columns for Name, Hostname, Version, and Installation Date. A 'Gateway Management' option is highlighted in the sidebar.
- Select **Manage** next to the gateway you wish to administer.
Details for this gateway are displayed:

The screenshot shows the details for a gateway named 'Mike'. It includes fields for Hostname (ILNBIL01115), IP Address (10.36.32.17::1), Installation Date (13-Jan-2016), and Operation System (Microsoft Windows NT 6.1.7601 Service Pack 1). There is a section for 'ACCESS URLS' with a text input field containing 'http://10.36.32.17:8081/MoyantLinkWCFService/Messaging' and a 'Remove' button. Below this are 'Add', 'Save', and 'Cancel' buttons. At the bottom, there is a 'GATEWAY MEMBERS' section with a search bar and a 'Remove' button.
- To add a new URL, select **Add**.
This is used by an external client application to communicate with the **Qquery Gateway**. For example, when launching **TraumaCad** from **Qquery**, it looks for these URLs and tries to communicate with the gateway in order to support local PACS integration.

How to Give a User Access to a Gateway

To give a **Qentry** user the right to access the gateway, they must become a gateway member. A user added to the **Gateway Access List** can log in to the gateway installed in the hospital.

As the gateway is connected to the PACS system, ensure that only users with access rights are able to Query/Retrieve/Commit images from/to the PACS. Users that are not added to the access list cannot log into the gateway with their **Qentry** credentials.

To change a user's access rights:

Step
<p>1. Search for an existing Qentry.com user by entering an appropriate detail in the search field under Gateway Settings. You can enter part of their:</p> <ul style="list-style-type: none"> • Brainlab ID • First name and surname <p>Qentry.com displays a list of possible matches.</p>
<p>2. To request that a person on the list becomes a member, select Add as Member.</p>

4.5 Making Reports

General Information

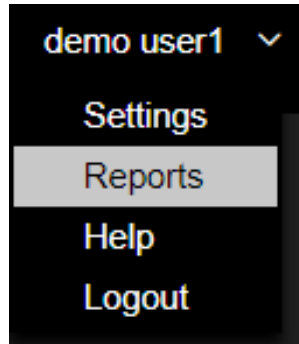

Figure 7

Select **Reports** for all logs and **TraumaCad** reports.

Available Reports

Report	Description
User Activity	Logs of your activity on Quentry.com
Account Activity	Logs of account activity (e.g., folders uploaded in CareTeam) on Quentry.com
Orthopedic Reports	TraumaCad pre-planning reports (e.g., Implant Name, Implant Part Number, Manufacturer etc.) <i>NOTE: Available to licensed TraumaCad users only.</i>

Orthopedic Reports
